OCEANS ARE IMPORTANT

Healthy oceans serve as a natural resource bank for current and future generations.

THE OCEAN’S WEALTH

Ocean account for much of the planet’s economic prosperity.

POLLUTION & PROTECTION

Our oceans are under severe threat from human impacts.

MAXED OUT FISHERIES

Overfishing is exhausting a critical source of protein and livelihood.

SOURCES:

THE WORLD’S OCEANS

The world ocean fisheries are categorized as

- Recovering (30%)
- Over-exploited (20%)
- Depleted (57%)
- Fully exploited (3%)

The Global Partnership for Oceans is a growing alliance of governments, international organizations, civil society groups, and private sector interests committed to addressing the threats to the health, productivity and resilience of the world’s oceans.
